

PRIYAL JAISWAL

DATA ANALYST

Maharashtra, India • priyaljaiswal07@gmail.com • +91 8840969996 • LinkedIn

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience across data analysis, business intelligence, and quality assurance, specializing in SQL (PostgreSQL), Python (Pandas, NumPy), Advanced Excel, and Metabase dashboard development. Experienced in building end-to-end ETL pipelines, automating manual reporting workflows (~94% faster), and delivering real-time financial dashboards that improved reporting efficiency by 50% for cross-functional stakeholders. Designed and shipped production data products at Ayekart — **OpsPilot AI**, a live KPI-monitoring, anomaly-detection, and automated-remediation platform, and a multi-brand **DMS Bulk Upload** order-processing and reconciliation pipeline. Strong in data cleaning, reconciliation, KPI reporting, root-cause analysis, and stakeholder communication, with a track record of turning complex datasets into decisions leadership can act on.

CORE SKILLS

- **Data Analysis & Programming:** SQL (PostgreSQL), Python (Pandas, NumPy), PySpark, Data Cleaning, Statistical Analysis, Data Reconciliation, Fuzzy Matching
- **BI, Monitoring & KPIs:** Metabase, Dashboard Development, KPI Design & Reporting, Anomaly Detection (thresholds, % deviation, Z-score), Incident & Alert Workflows
- **Visualization & Reporting:** Advanced Excel (Pivot Tables, VLOOKUP, Macros), Data Storytelling, Executive Reporting
- **Tools & Platforms:** PgAdmin, Jira, VS Code, Postman, Selenium, Git, Cursor (AI-assisted development)
- **Business & Process:** Business Analysis, Stakeholder Communication, Cross-Functional Collaboration, Requirements Gathering, Root Cause Analysis, Agile, SDLC

PROFESSIONAL EXPERIENCE

Data Analyst

Sept 2023 – Present

Ayekart Fintech Private Limited | Pune, India

- Automated manual data-processing workflows using Python, cutting turnaround time from a full workday to 30 minutes (an estimated 94% reduction) and freeing analyst hours for higher-value work.
- Built and deployed interactive Metabase dashboards tracking key financial KPIs, giving leadership real-time visibility into performance and improving reporting efficiency by 50% across finance and operations teams.
- Engineered end-to-end ETL pipelines in Python and SQL to integrate data from multiple source systems, reducing data retrieval time by 35% and improving the reliability of downstream reporting.
- Wrote and optimized complex SQL (PostgreSQL) queries against large-scale datasets, improving query performance and enabling faster, more accurate decisions across departments.
- Developed predictive models in Python to forecast revenue and financial trends, improving forecast accuracy by 20% and supporting more confident strategic planning.
- Partnered with finance, product, and operations stakeholders to gather requirements and translate business questions into data analyses, ensuring dashboards and reports directly supported decision-making.
- **OpsPilot AI (Production):** Designed and shipped a live operations platform that schedules SQL KPIs, detects anomalies, opens incidents, and routes alerts — enabling finance and ops to catch data breaks in real time instead of waiting on month-end reports; built visual automation workflows (SQL check → condition → alert/fix) for remediations.
- **DMS Bulk Upload:** Built a multi-brand Excel order-processing pipeline (HUL, Marico, Britannia, Unicharm, and others) with fuzzy product matching, batch/stock validation, and an interactive exception workflow, plus Python/SQL reconciliation audits (input vs DB, WMS, invoice, and Tally) used by ops and finance to correct quantity, product, and amount mismatches.
- Leveraged AI-assisted development (Cursor) to accelerate SQL, audit scripts, and workflow logic, while personally owning business rules, sampling, dry-runs, backups, and production validation.

Quality Analyst

Feb 2023 – Aug 2023

Creanovation Technology | Bhubaneswar, India

- Executed end-to-end testing and database validation across multiple Agile projects, ensuring data accuracy and consistency prior to each release.
- Analyzed recurring defect trends using statistical methods and root-cause analysis, reducing repeat issues by 30% and increasing defect-detection efficiency by 25%.
- Collaborated with database administrators to optimize data retrieval and storage, improving overall system performance and data reliability.
- Authored and validated structured test cases to confirm data accuracy within relational databases, reinforcing QA rigor across the SDLC.

EDUCATION

B.Tech in Computer Science Engineering | Vivekananda Global University, Jaipur, India | 2023 | CGPA: 7.5/10
